Customer Testimonial after taking the CarryOn on a cruise:

“The BuzzAround CarryOn scooter has truly changed my life! My wife and I love to travel, but my physical limitations used to hold me back. Discovering this scooter changed everything. Its lightweight design and strong performance have allowed us to enjoy our adventures again. Folding it up for storage is easy, and the battery lasts a long time.

Everywhere we go, people ask me about it. I love showing off how easy it is to fold and how well it moves in tight spots. It's the perfect travel companion.

Thank you, Golden Technologies, for giving me my life back!”

Convenient kickstand for small space storage!

TIP: Check with your cruise line or refer to specific cabin information for accurate underbed measurements. A typical range for underbed storage height on cruise ships is between 8 to 12 inches (20 to 30 cm).
